Confirmation (modules with low PID and LID)

To whom it may concern,

Meyer Burger has commissioned IEC tests according to IEC61215-2:2021 MQT21 at Fraunhofer ISE. The tested sequence also included the light stabilization procedure gate 1 (IEC61215-1:2021 MQT19). The tested modules were glass-glass modules of type "Meyer-Burger Glass" as well as glass-backsheet modules of type "Meyer Burger White". The modules passed the tests without power loss. A PID certification is in progress.

With kind regards,

Georg Mülhøfer
Head of Team TestLab PV Modules
Division Photovoltaics
